EDUCATION

Master of Science (MS) in Computer Science, GPA: 3.71/4.0

May 2024

Washington State University, Pullman, WA

Courses: Advanced Algorithms, Software Design and Architecture, Software Maintenance

Bachelor of Engineering (BE) in Information Science, GPA: 8.4/10

Aug 2021

BNM Institute of Technology, Bengaluru, India

Courses: Data Structures, Software Engineering, Object Oriented Programming, Software Testing, Database Management

TECHNICAL SKILLS

Languages: Python, Java, C#, C, JavaScript

Frameworks & Tools: .NET, Spring Boot, Node.js, Angular, React, Git, SonarQube

Databases: SQL, PostgreSQL, MongoDB

Cloud & DevOps: Azure, Azure DevOps

Others: Workday Studio, Tableau, Qualtrics

WORK EXPERIENCE

IT Application Developer - Washington State University, Pullman

May 2024 - Present

- Develop and maintain integrations connecting Workday with external systems, using **workday studio**, **EIB**, and **core connectors**.
- Enhance the security of 60+ Workday integrations by identifying and eliminating excessive domain permissions from **ISSGs** through rigorous testing and implementation.
- Expanding integration expertise by pursuing Workday Integration Pro Certification to deliver industry-compliant solutions.

Graduate Staff Assistant - Health Education, Washington State University

Jan 2023 – May 2024

- Built interactive dashboards in **Excel** and **Tableau** to deliver achievable insights from departmental data, that directly influenced a 15% increase in allocated year-end funding.
- Facilitated workshops on life skills and mental health, and increased workshop survey participation by 30% through **JavaScript**-enhanced Qualtrics surveys.

Software Developer - Accenture, Bengaluru

Aug 2021 - Jul 2022

- Engineered scalable **C# .NET** backend solutions for a healthcare system, leveraging **Azure DevOps** for efficient deployment.
- Developed comprehensive unit tests, achieving 80% code coverage and proactively ensuring code quality through continuous analysis with **SonarQube**.
- Contributed to database modifications and data mapping while collaborating with onshore Business Architects to deliver optimal project functionality.

Software Engineer Intern - Softvent Services Pvt. Ltd, Bengaluru

Jul 2020 – Sept 2020

- Collaborated with senior engineers to construct an RFID scanner using **C++**, followed by integrating an **SQL** database for efficient scanned data management.
- Proactively identified and resolved software and hardware errors, preventing potential system failures and improving overall reliability.

RELEVANT PROJECTS

CV Center

Feb 2023

- Executed a fully functional recruitment platform in 24 hours, securing 3rd place at a **Hackathon** by effectively managing time, collaboration, and problem-solving under tight deadlines.
- Developed robust backend features using **Spring Boot** and **PostgreSQL**, ensuring reliable performance and scalability for future growth and user demands.

Bullet Hell Shooter Game

Jan 2023 - April 2023

- Designed and implemented a scalable **Java**-based shooting game with three levels, demonstrating a strong understanding of **Object-Oriented principles** and software engineering best practices.
- Leveraged **design patterns** in Java using **Libgdx** framework, ensuring scalability, while gaining expertise in version control with **Git**.

Art Gallery Management System

Aug 2019 - Jan 2020

- Engineered a scalable web application for an art gallery, featuring a user-friendly interface designed to support 50 simultaneous users, facilitating efficient access to artist portfolios, artwork, and exhibition information.
- Designed a **MySQL** database schema with indexing and normalization to enhance data relationships, improving storage efficiency and query performance.
